

Bicycles in the building.

Bicycles constitute a hazard when they are moving around and being stored in the building and as a consequence most areas ban bikes from the building. In recognising that there are problems with theft and damage to bikes the OH&S Committee has agreed to the following compromise.

Bikes can be stored in individual offices where those offices are NOT shared. Bikes can not be stored in laboratories and this includes the honours laboratory.

At no time are bikes to be ridden in the building.

Storage of bikes is permitted on the internal balcony on the westerns side. If you have you bike stored in the building you should not attempt to retrieve the bike during an emergency evacuation.
