

Labelling of Chemical Containers

It is very important to label all containers properly with

- 1. Chemical name and concentration**
- 2. “HAZARDOUS CHEMICAL”** (if appropriate) in red
- 3. Your name or initials**
- 4. pH**
- 5. date of preparation**
- 6. major hazards.**

Also label all goods received with the date the goods were received, and your name.

NB The Chemwatch computer in lab A-39 can print appropriate labels for chemical bottles.
