Tuesday 6 October, 5.30–6.30pm

The Finkel Lecture Theatre, The John Curtin School of Medical Research
Building 131, Garran Rd, ANU

This lecture is free and open to the public. Refreshments will follow the lecture.

Enquiries T: 6125 2026 or E: will.wright@anu.edu.au

Governments, internationally and in Australia, are increasingly encouraging team-based care in frontline health systems using various incentives. Dr Campbell will provide an overview of the impact of financial incentives on the performance of primary care professionals.

Dr Campbell is a senior research fellow at the National Primary Care Research and Development Centre at the University of Manchester and he also holds a joint appointment at the Department of General Practice at the University of Heidelberg, Germany. His research on the quality of care in general practice has directly influenced policymakers in the UK in terms of the development of the Quality and Outcomes Framework and Primary Medical Care Provider Accreditation. He co-led an 11-European country collaboration looking at the development and improvement of cardiovascular disease. He has also collaborated successfully with researchers from other countries such as Austria, Belgium, Canada, France, Finland, Germany, Mexico, Netherlands, Slovenia, Spain, Switzerland and USA.

Please note there is limited availability of parking at ANU and guests should consider alternative forms of transport or allow sufficient time to find appropriate parking. To join the ANU Public Lectures mailing list or to listen to selected podcasts, visit www.anu.edu.au/publiclectures
