The Global Summer Program (GSP) is supported by the International Alliance of Research Universities (IARU) and is an exciting learning experience that connects university students with outstanding peers from around the world.

GSP features courses offered by the 11 IARU partner universities.

Participants will gain new perspectives, often leading to research in a specific field, and must go on to do their graduate studies, perhaps at an IARU university.

Through a mix of lectures, tutorials, peer interaction, and field trips, participants become a part of a great association of students and faculty, leveraging on what the alliance of universities can offer.

Classes are rigorous and intense as they are designed for the best students from IARU universities who come together to explore and discuss challenges that are often difficult to achieve.

Information on the 2017 GSP courses, eligibility criteria, and application dates are available on both the ANU and IARU websites. If you wish to see the details of the courses on offer, please visit the IARU Global Summer Program page.
