# Combined Courses

The combined courses offered by the University enable students to expand their career options, as they have access to the directly related specialist employment available to each degree. The combination of expertise or professional training with a broad educational base is keenly appreciated by employers.

Details of individual units are set out in the separate Faculty entries.

Because of recent changes to course requirements and the range of choices available, it is recommended that students (particularly continuing students) consult the relevant sub-dean/s or faculty adviser/s about their course structure.

## **Separate Completion of Components of a Combined Course**

When following a combined course, it is normally possible to take out each degree component separately [except in the case of the Bachelor of Arts/Bachelor of Arts (Visual)]. In the following section the requirements for admission to each of the degrees are given. Students should note however, that once they have been admitted to one of the degrees, the requirements for the total combined course have to be completed before the second degree can be awarded.

## **Honours**

A student may normally pursue honours in either or both degree components of a combined course and should consult the appropriate Faculty entry in the Handbook and/or the relevant Faculty Office about the requirements for honours in that Faculty.

### Notes

1. Students pursuing the combined course may construct their own enrolment patterns, subject to satisfying prerequisites. In particular, they may take longer than 5 years to complete the combined course. The accelerated course pattern is provided as a guide to students who may wish to complete the combined course in 5 years of full-time study, which involves overloads in a number of semesters.
2. Arts units must be chosen to satisfy the requirements of the BA combined course rules. In particular, a 42 credit point departmental major is required.
3. To meet the accreditation requirements of the BE degree in the context of the combined BE/BA that can, in principle, be completed in 5 years, certain units in the Faculty of Arts can be taken in lieu of specific Engineering units. POLS1002 Introduction to Politics is taken in lieu of the Engineering Law unit normally taken by Bachelor of Engineering students; POLS1004 Introduction to Political Economy is taken in lieu of the Financial Systems unit. Students may also take ECHI1105 and ECHI1106 in lieu of the Engineering Law and Financial Systems units.
4. Students who wish to major in Political Science should take POLS1002 and POLS1004 in their first year instead of in their third year.
5. The 18 credit points of Engineering electives must be chosen from the Engineering electives list (see Department of Engineering entry).

(course code 4706)

The combined course BE/BSc combines the engineering degree with further specialisation in mathematics, physics, chemistry, computer science, biochemistry, psychology, resource management and environmental science, or any other science discipline at ANU. The combined course results in the award of the Bachelor of Engineering (BE) degree and the Bachelor of Science (BSc) degree.

### **The combined course consists of:**

- ◆ at least 240 credit points
- ◆ normal duration of full-time course: 5 years

### **Minimum requirement from each Faculty:**

#### **SCIENCE**

- ◆ in addition, at least 48 credit points of units offered by a science-related department ie. Department or Division in the Faculty of Science or the Departments of Computer Science or Statistics & Econometrics, including
  - ◆ at least 12 credit points of Group B units
  - ◆ at least 36 credit points of Group C units

### **Admission to the degree of Bachelor of Engineering requires:**

- ◆ at least 192 credit points which satisfy the requirements of the Bachelor of Engineering degree

### **Admission to the degree of Bachelor of Science requires:**

- ◆ at least 144 credit points of units offered by a science-related department or by the Faculty of Engineering and Information Technology, including

    - ◆ at least 12 credit points of Group B units offered by a science-related department
    - ◆ at least 36 credit points of Group C units offered by a science-related department

Science units are described in the Faculty of Science section of the Handbook.

If more than 12 credit points of Group B units or more than 36 credit points of Group C units are taken, it may not be possible to complete the BE/BSc course in the minimum time of 5 years.

The selection of Group B Science units must take into account the prerequisites for Group C Science units. Not all Group B Science units may be available because of timetable restrictions.

1. Students who wish to major in Mathematics or Computer Science are recommended to take the standard first year course pattern of the BE course.
2. Students who wish to major in Physics will need to complete requirements equivalent to PHYS1001 (a full-year subject) instead of ENGN1214 and ENGN1226, but should enrol in ENGN1214 in the first instance.
3. Students who wish to major in Chemistry take CHEM1014 in Semester 1 and take CHEM1015 in Semester 2. These replace ENGN1225 and ENGN1226. (Such students will need an ACT minor in Chemistry.) This results in a 30 credit point first semester and a 24 credit point second semester.
4. Students who wish to major in Biochemistry take CHEM1014 in Semester 1 and take BIOL1004 in Semester 2. (Such students will need an ACT minor in Chemistry.) This results in a 30 credit point first semester and a 24 credit point second semester. Students must consult the Head of the Division of Biochemistry and Molecular Biology before enrolling in BIOL1004.
5. Students pursuing majors in other science disciplines (for example, Psychology, Resource Management and Environmental Science) take Group A units in their chosen discipline to the value of 12 credit points (eg., PSYC1001, GEOG1005) instead of ENGN1225 and ENGN1226. # Australian National Internships Program

J.M. Hutchison, BA *Syd*, PhD *ANU*  
Director of Program

The Australian National Internships Program provides senior undergraduates with the opportunity to undertake, for academic credit, a designated research project within the workplace. Students may be from any Australian or overseas university, from any discipline (former interns have been students of political science or policy studies, communications or information technology, economics or commerce, law, geography, science, Asian or European studies, development studies, environmental studies, social work, linguistics, sports studies, music).

All placements are in Canberra, for approximately ten weeks; the possibilities are with:

- ◆ the Commonwealth Parliament (with a Senator, Member, parliamentary committee or parliamentary department);
- ◆ the Australian Public Service (with government departments or statutory authorities, such as the Department of Foreign Affairs and Trade, Environment Australia or AusAID);
- ◆ the ACT Legislative Assembly and ACT Public Service; or
- ◆ non-government peak and community organisations (these range from industry associations such as the Australian Chamber of Commerce and Industry, the National Farmers Association or the Motor Trades Association of Australia, to organisations such as the Australian Council for Overseas Aid or Greening Australia ).

## Prerequisites

Students are admitted by a Selection Committee which meets twice a year (November and June). Minimum requirements are that students are in their third year of academic study and that the internship will be officially credited to their degree by their home university.

Students therefore need to consult and obtain permission from their course adviser or a letter of cross-institutional support.

## Internship A INTN3004 (18cp)

Semester 1 and semester 2

*Principal Lecturer:* Dr Hutchison

*Syllabus.* This unit is most suitable for undergraduates and overseas students and others with little knowledge of the Australian political system. Students complete course work on the policy making process during the fifteen week semester and a placement for approximately two and a half days a week over a ten week period, backed by a weekly workshop.

*Assessment:* A written or oral presentation on the course work; a research report to a maximum of 8,000 words; an oral presentation on the research report; and a reflective essay.

## Internship B INTN3005 (12cp)

Semester 1 and Semester 2 and Inter-Semester X2  
(Winter)

This unit is especially suitable for Honours students or those completing joint degrees. There is no coursework component. Following an orientation program the Internship placement is for ten weeks.

*Principal Lecturer:* Dr Hutchison

*Syllabus:* The Internship placement will be for approximately two and a half days a week over a ten week period, and will be backed by a weekly workshop.

*Assessment:* A research report to a maximum of 8,000 words; an oral presentation on the research report; and a reflective essay.

## Internship C INTN3006 (18cp)

Semester 1 and Semester 2 and Inter-Semester X2  
(Winter)

This unit is especially suitable for Honours students or those completing joint degrees, who wish to complete a significant project. There is no coursework component.

Following an orientation program the Internship placement is for ten weeks.

*Principal Lecturer:* Dr Hutchison

*Syllabus:* The Internship placement will be for approximately four days a week over a ten week period, and will be backed by a weekly workshop.

*Assessment:* A research report to a maximum of 16,000 words; an oral presentation on the research report; and a reflective essay.
