

# Staying COVID safe on campus

An overview of measures we've put in place and things you need to do to stay COVID safe on campus.

**Stay home if you're sick** – get tested and follow health advice

**Keep your vaccinations up to date**

**Wear a mask** inside, as required

**Keep your distance** from others where possible

**Hand hygiene** – use hand sanitiser or wash hands frequently

**Be kind to each other**

**Get tested** if you've been exposed or are symptomatic

**Tell us if you test positive** – notify us using the form on the ANU COVID-19 website and let your supervisor or course convenor know too

**Notifying you of exposure** – we assess the risk of all cases we are notified of and will notify you through your college or service division if necessary

**Improved ventilation** - we're modifying the systems in our buildings which includes changing CO2 setpoints, introducing more fresh air and having it circulated more frequently, and upgrading our air filtration systems. More detailed information is available on the ANU COVID-19 website

## Key dates

- **Monday 21 February** – Semester 1 begins
- **Monday 28 February** – last day to add Semester 1 courses on ISIS
- **Thursday 31 March** – Semester 1 census date
- **Friday 27 May** – Semester 1 ends
- **Thursday 2 – Saturday 18 June** Semester 1 examination period

## Events

We're running a full program of COVID safe events, check out [www.anu.edu.au/events](http://www.anu.edu.au/events) for more

## Remote work/study

We know some of our students and staff won't be able to come to campus. Talk to us about alternatives or check out the website.
