Legend	
Implemented for applicable systems	X
In progress for applicable systems	O
The building has operable windows	✓

**Notes**  
Some library systems run continuously and so pre and post purge is not applicable  
\*Indicates that the initiative is not applicable to all systems within the building and category type  
Implementation Category 1 - General spaces within buildings that also contain teaching areas. Expected completion by the 11th of April  
Implementation Category 2 - General spaces within buildings that also contain large shared/mixing areas. Expected completion by the 9th of May  
Implementation Category 3 - Buildings that are neither category 1 or 2. Expected completion by the 6th of June.

Glossary	
<b>Category Library</b>	A Library building
<b>Category Teaching Space</b>	A schedulable teaching space
<b>Category General</b>	Any occupiable space not a library or a teaching space
<b>Option 1</b>	CO2 setpoints have been revised to 650ppm as opposed to the typical 850-1000ppm. The process is handled automatically via the buildings controls system. Refer to the below links for further details.
<b>Option 2</b>	Outside air rates have been increased when ambient temperatures permit. This process is handled automatically via the buildings controls system. Refer to the below links for further details.
<b>Option 3</b>	Pre and post purge (flushing with fresh air). This process is handled automatically via the buildings controls system. Refer to the below links for further details.
<b>Option 4</b>	The filtration has been upgraded to MERV13. This type of application is achievable and will improve our filtration efficiency by up to 300 per cent (for 3 – 10 µm particles).
<b>Operable windows</b>	The space has operable windows. Occupants should open windows when ambient temperatures permit.
